TOMAS FERRER

tomasferrer.com | NYC Metro (CT) | U.S. Citizen

SUMMARY

Product data scientist with 10+ YoE in Data Science, Analytics, production ML models, and applied GenAI in fintech and marketplaces. Expertise in causal inference, product launches, & measurement at scale

WORK EXPERIENCE

Block / Cash App **New York, NY May 2023 – May 2026**

Staff Product Data Scientist (L6), Lending, Banking

- Owned portfolio experimentation and analytics for Cash App's $1B+ lending portfolio through triple-digit growth; tested repayment, duration, and growth levers against volume and margin
- Led data science for product launches for Overdraft, Retroactive Financing BNPL, Card Offers; 0-1 data models, experimentation, monitoring that guided rollout decisions
- Identified fraud & abuse patterns across the lending portfolio, partnered with engineering to mitigate losses and compliance risk
- Developed agentic workflows to clear customer support backlogs, cutting manual review 40% and restoring SLAs

Mynd (Series C startup, acq. Roofstock) **San Francisco, CA Jan 2021 – May 2023**

Head of Data Science & Analytics

- Built and led data science function from zero, scaling to 6 data scientists; trained & deployed machine learning models for pricing, demand forecasting, and predictive maintenance models core to platform operations
- Led analytics strategy with C-suite, translating pricing and forecasting models into investment decisions across an $850M+ property acquisition pipeline
- Built the decision framework for CAC, LTV, and channel attribution, guiding marketing budget allocation

Lyft **San Francisco, CA Oct 2018 – Nov 2020**

Data Scientist, Marketplace

- Owned supply-side strategy for high-variance markets, led intervention that delivered $3M+/year in savings
- Owned regional incentive strategy, allocating $50M to balance supply and demand and grow rides
- Developed forecasting models and identified fraudulent exploitation patterns; insights shaped regional playbooks and saved $500k+/year

Procter & Gamble **Cincinnati, OH Aug 2014 – Oct 2018**

Operations Manager, Data Science Manager

- Built process automations for retail channel operations, reducing manual workload and increasing accuracy
- Developed campaign and supply chain optimization models adopted nationally; pilots led to +15% sales lift

Boston Consulting Group **Buenos Aires, Argentina Mar 2013 – Jun 2014**

Associate

- Delivered strategy and operations engagements for banking and industrial clients across Latin America

EDUCATION

Johns Hopkins University **May 2018**

Master of Science, Applied Mathematics & Statistics | Merit Scholarship

Instituto Tecnológico de Buenos Aires **Dec 2012**

Engineering Diploma, Industrial Engineering | Exchange: University of Pennsylvania

WRITING

- "Advanced Forecasting: Using ML to build multi-state probability distributions" (Medium.com, 2022)

SKILLS

Python, SQL, data engineering, forecasting, machine learning, statistical modeling, causal inference, experimentation, anomaly detection, bayesian statistics, classification
